FORTA PRO
WE BUILD MODULAR

Forta PRO designs and manufactures prefabricated bathroom units and WC Pods for the hotels, apartments, commercial and residential buildings, healthcare facilities, nursing homes and more. Forta PRO bathroom PODs are designed and built under strict controlled conditions and shipped as a complete assembled unit from our factories. The bathroom PODs is constructed from steel profiles, with high-performance interior panels or any other finishes according to the customer request. The bathroom PODs provide excellent fire and acoustic rating possibilities and are completed with all accessories as per client specifications.

Key advantages of using Forta PRO bathroom PODs:

Safety and Quality control

Forta PRO bathroom PODs are built under controlled factory environment ensuring high quality of production and QA, resulting in lower failure rates. Working in our factories reduces site risks and ensures the safety of the workers. Elements stay cleaner, with less risk of damage and rework, without exposure to the weather elements.

Tested and Certified

Forta PRO bathroom PODs are delivered fully tested in the factory for easy and safe connection to all main building supplies. All materials and production methods are certified according to international and European standards.

Individual Design

Forta PRO bathroom PODs are designed and built by experienced team, specialized in modular design and manufacture. Forta PRO inhouse design team provides each client individual approach, wide range of color schemes and accessories.

Supply Chain

Forta PRO uses for its' production durable, reliable and high-quality materials from proven European suppliers.

Timesaving

Forta PRO bathroom PODs are produced in parallel with the onsite construction activities. The PODs are delivered on-time for installation, instead of waiting for it to constructed onsite.

Less Workers and Onsite Supervision

The bathrooms are normally one of the rooms that require the most attention and at least 6 to 8 different workers. Forta PRO bathroom PODs need much less labor, coordination and supervision onsite, easy to install, connect and complete.

Easy Maintenance

Forta PRO bathroom PODs installed and connected to all services in the riser shaft, which gives easy access to maintenance.

Accessible Bathroom Units/PODs

Forta PRO supplies prefabricated, accessible bathroom PODs to healthcare facilities, hospitals and care homes, adopting the highest standards. Forta PRO understands these needs and provides fully compliant bathroom PODs as an alternative to traditional build. Our healthcare PODs offer a durable, robust and hygienic finishes and fully equipped with seats and handrails for better accessibility.

Forta PRO accessible PODs are designed with special attention to the people needs, functionality and safety. Special accessories developed in compliance with strict requirements regarding hygiene, user friendliness and accessibility to ensure independent living.

Accessible bathrooms designed for wheelchair users. Requiring enough clear floor space for a wheelchair to make a 180° turn.

Forta PRO designs and produce modular hospital buildings in various sizes and functionality, including Operating Theatres and Radiology clinics. The solution can be permanent or on a temporary base, for example when renovation process is performed.
